

Solum

Andrew Méndez, Tyler
Rojas, William Nguyen

Business Background

- Rising obesity rates and increased smartphone usage
- High demand for fitness and health tracking apps

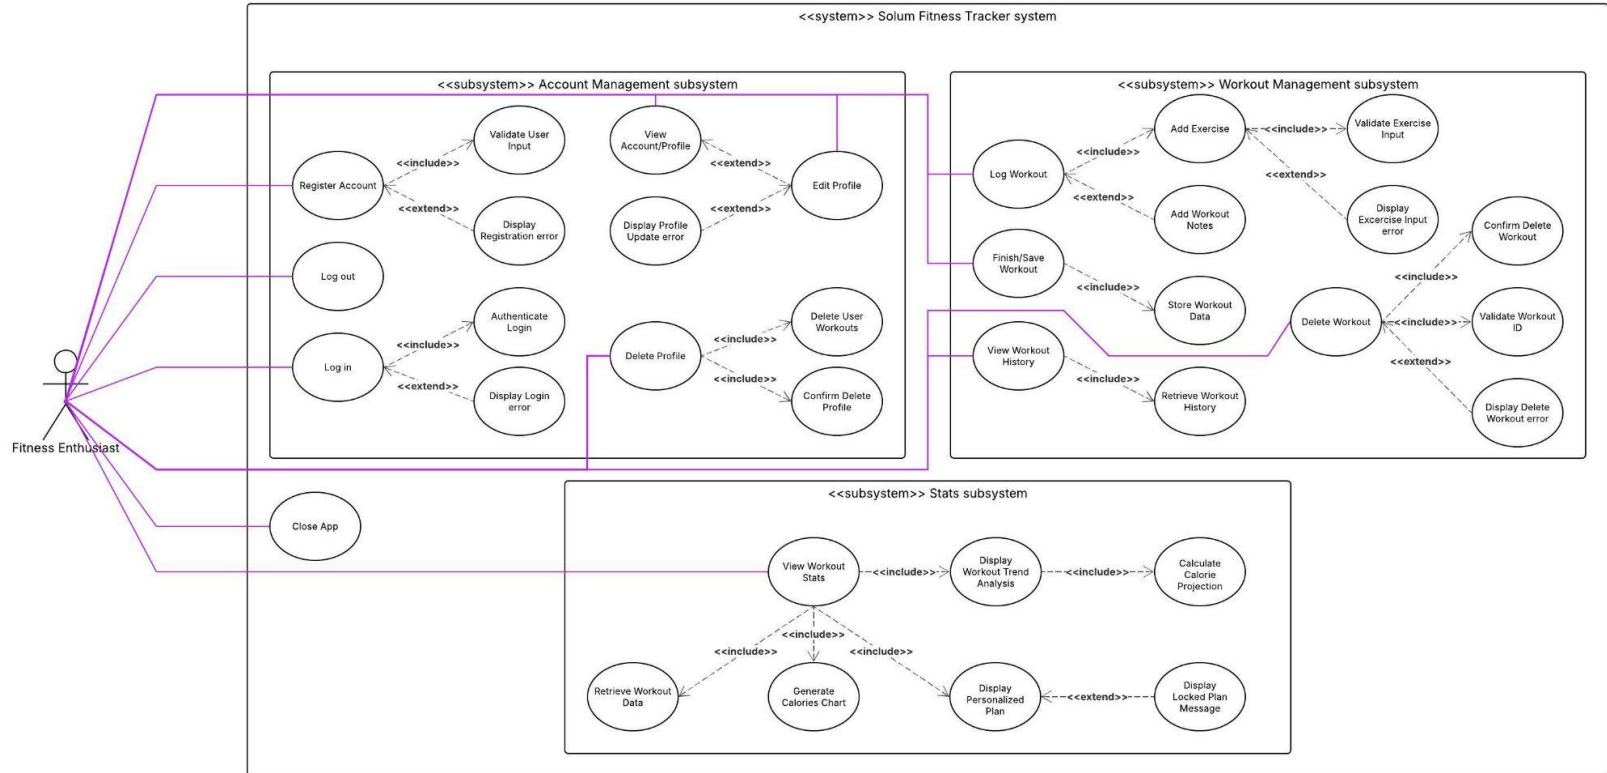

Problems:

- Tracking stats are often spread across multiple apps
- Generic Recommendations aren't adapted to users
- Advanced features are locked by paywalls

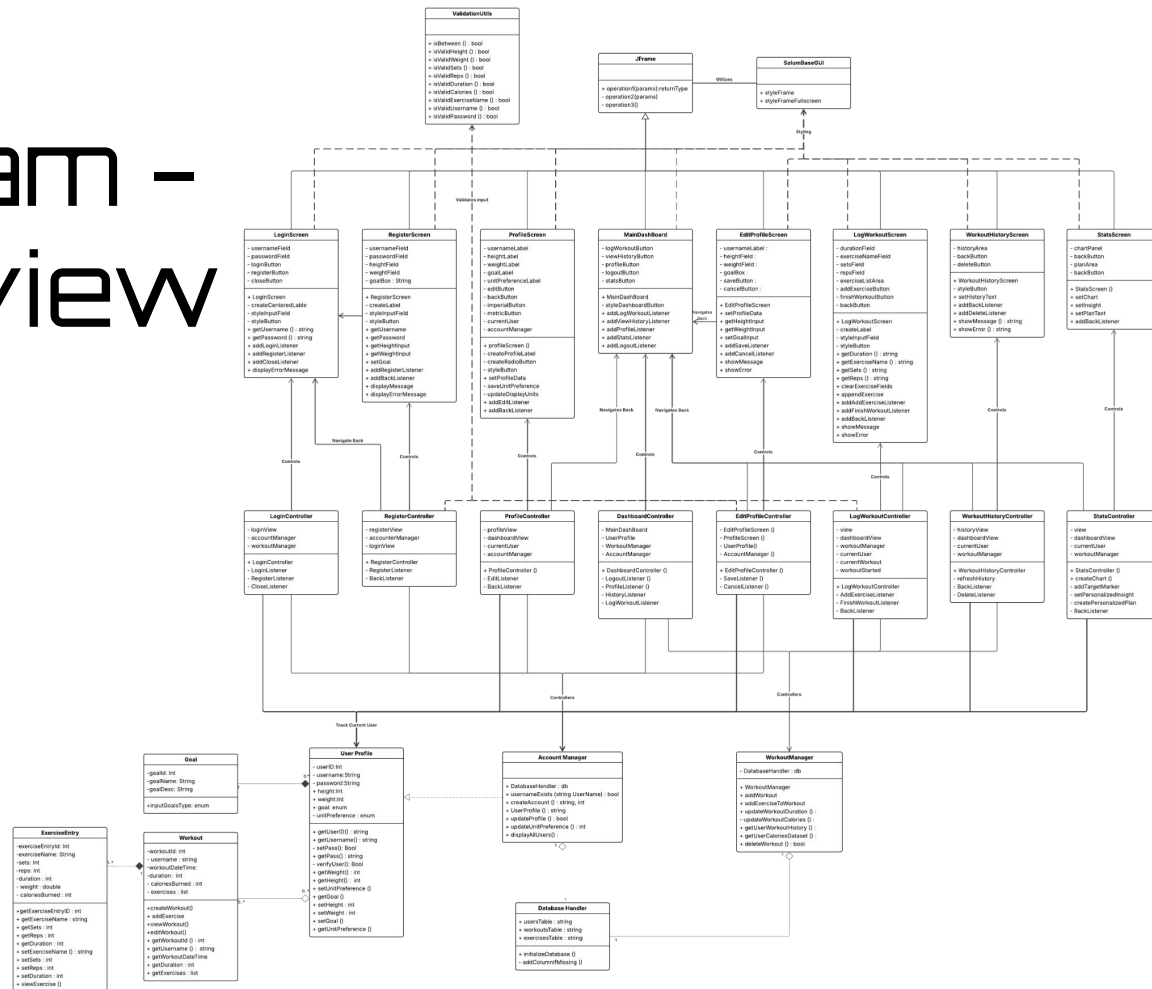

Scope:

- Solum is a fitness application that supports workout logging, calorie tracking, and goal management
- Centralizes fitness data into a single system and is designed to support future feature expansion and increased data usage
- Personal plans and projections will be given based on user activity

System Demonstration!

The screenshot displays a dark-themed user interface for a system named 'SOLUM'. At the top center, the word 'SOLUM' is written in a large, bold, light blue font. Below it, the text 'WELCOME FITNESS ENTHUSIAST' appears in a smaller, all-caps, light blue font. The interface features two input fields: 'Username' and 'Password', both with light blue borders and placeholder text. Below these fields are three buttons: 'Close App' and 'Register Account' are side-by-side, and 'Log In' is centered below them. All buttons have a light blue border and text. At the bottom center, the version number 'v1.0.0' is displayed in a small, light blue font.
